

TRIVACO

Company Overview

Total Plant Solution Provider

About TRIVACO

Tri-State Valves and Controls, Inc. (TRIVACO) is a regional specialty valve, instrumentation and equipment supplier utilizing state-of-the-art technology to offer our customers quality products, customized solutions and diversified services. Headquartered in Hebron, KY, **we distribute and service specialty valves, actuators, actuation controls — including limit switches, positioners, and solenoids — valve monitoring instrumentation, and equipment from leading manufacturers.** TRIVACO serves industrial markets in Ohio, Kentucky, Indiana, Tennessee, West Virginia, Pennsylvania, Georgia, Alabama, Mississippi and Florida. Current markets served include:

- Power Generation (fossil and hydro)
- Pulp & Paper
- Coal Preparation
- Steel & Aluminum
- Chemical Process & Refineries
- Tank Farms
- Pharmaceutical
- Oil and Gas Transmission
- Municipal Water and Waste Water Treatment
- Food & Beverage

TRIVACO Manufacturing and Services

Our knowledge and experience are unmatched in delivering engineered products and solutions with exceptional service. We have resources for practically any situation:

- Design and Engineering
- Fabrication and Machining
- Service and Installation
- Valve Repair Shop
- Masoneilan Authorized Repair Center

We can provide a complete turnkey automation system

Whether you're implementing a new engineering solution or planning an upgrade to an existing one, TRIVACO is committed to ensuring a smooth implementation and ongoing success. We understand the challenges you are facing and know exactly how to implement complete turnkey valve, automation and instrumentation solutions to help you overcome those challenges. Marrying best practices with your process requirements to achieve the optimal outcome is our job.

FRP Fabrication Solutions

TRIVACO Fiberglass Systems Products and Services Include:

- Wholly Integrated Fiberglass Pipe and Grating Fabrication Shop
- Field Fabrication and Installation Available Upon Request
- Fully Insured, Fully Certified To ASTM B31.3
- Taper Joints To 24" – Socket Joints To 12"
- Saddles, Tee Miters, Butt Wrap Joints To 60"
- Fiberglass Pipe Fabrication and Installation

"As usual, your crew did an amazing job. Prompt, professional and typical TRIVACO rock stars."

~ MAJOR PROCESSING PLANT

Field Service and Installation

TRIVACO is recognized as an authorized factory service center for the following manufacturers:

- EIM Electric Actuators
- Kinetrol
- KOEI
- Masoneilan (MARC)
- TopWorx™
- Power Drive®
- ValvTechnologies
- VRC
- Yokogawa Rep Serve

Valve Repair Shop

TRIVACO offers extensive experience in industrial valve repairs, including safety relief valves. We hold three National Board “VR” Certificates and offer testing and repairs from the Midwest, Northeast and Southeast Regions. TRIVACO’s staff has extensive experience in Oil & Gas, Pharmaceutical, Chemical, Pulp & Paper and Power industries. Additionally, our staff continually strives to participate on continued education and training in order to provide the industry’s best practices and regulations. Our goal is to provide quality craftsmanship and provide cost savings of up to 70%.

"It takes a team to make magic like a rush request/delivery happen. Thank you very much for relaying our concerns to CDC, requesting replacements, and initiating rework for the discs that didn't receive the UD stamp. The replacement UD stamped discs were received yesterday morning at 10:20 AM OUTSTANDING!!!"

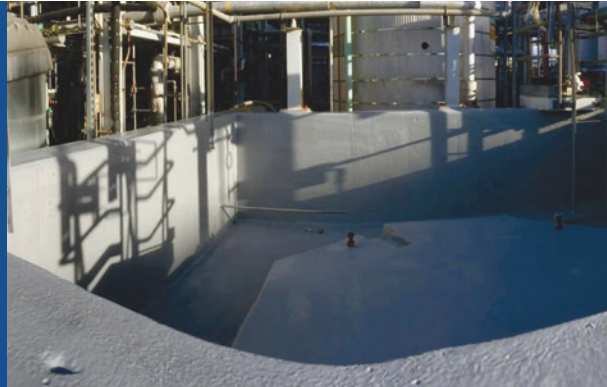

~ MAJOR PHARMACEUTICAL COMPANY

Industrial Coatings

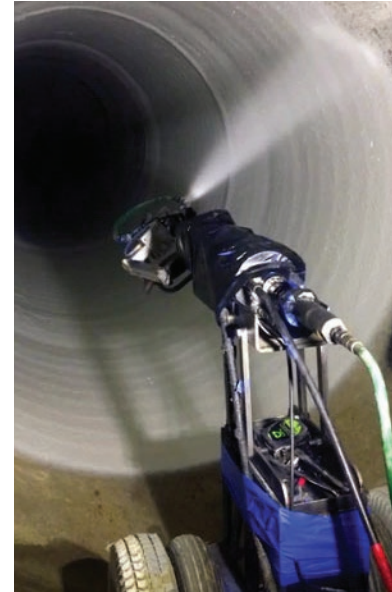

At TRIVACO, we offer world-class industrial coating solutions from Belzona. Our industrial coatings protect your valuable equipment from damage caused by abrasion, corrosion, vibration, and more. This approach to refurbishment and protection avoids the need for replacement, reducing repair and maintenance costs, and above all, downtime. Our capabilities include industrial coating solutions for:

- Pipe Coating
- Primary Containment
- Secondary Containment
- Chemical Containment
- Industrial Flooring
- Heavy Equipment
- Tank Relining

Protect Equipment, Save Money with Industrial Coatings

The benefits of industrial coatings are applicable across a wide range of markets. At TRIVACO, our unique engineering experience helps us implement industrial coating solutions across many diverse markets. No matter what your industry, we can protect your equipment and save you money with coatings designed specifically to meet your needs.

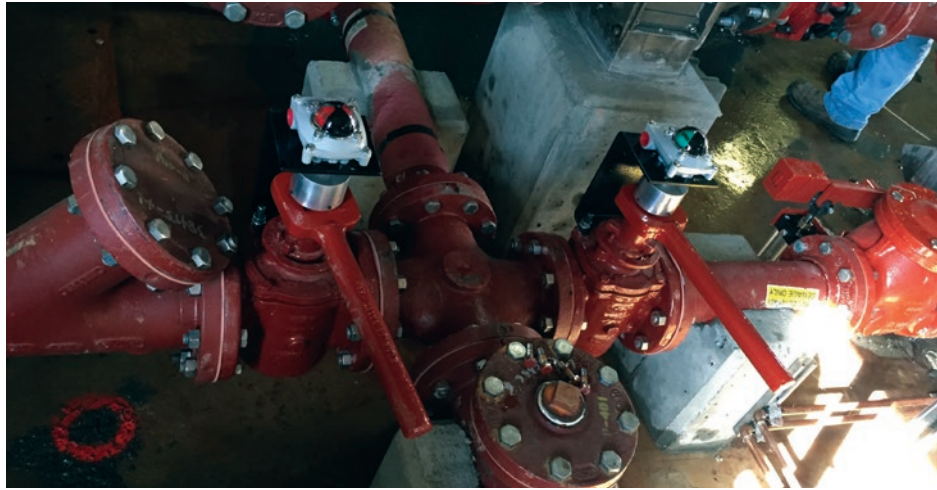

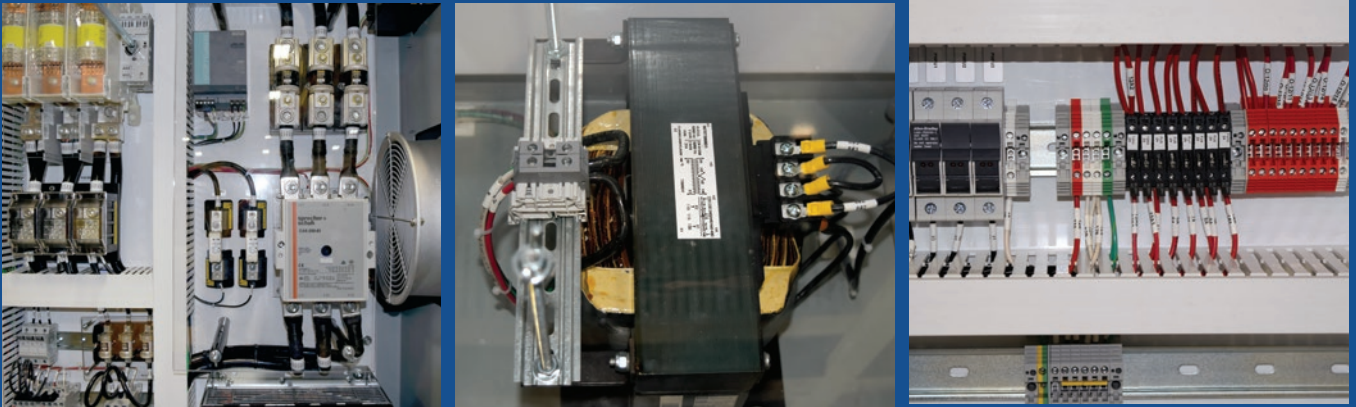

Municipal Water and Wastewater

TRIVACO's Municipal Market Division specializes in water and wastewater applications. Focusing on treatment plant work, We have a full range of industry-leading products to assist in any of your needs, from valves to actuators, instrumentation to protective coatings, and everything in between.

TRIVACO has a fully staffed field service team that can troubleshoot and solve issues in the field and even perform the installation of our equipment. We can service every product we sell, either in the field or in our 40,000 sq. ft. shop, and can often service and repair our competitors' equipment as well.

UL Panel Shop

TRIVACO Process Automation understands the many dimensions of infrastructure upgrade and design build projects. We can define and document how your process works, determine how to improve operational efficiency, and then help you to design, build and operate your new or improved system.

Our construction staff and support personnel employ their diverse skills to assess, design, construct, integrate, and commission your project along with the ability and personnel to provide maintenance. TRIVACO is a one-stop shop when it comes to Process Automation. Our in house control panel shop is both UL 508A (non-hazardous) and 698A (hazardous) certified. TRIVACO Process Automation can build control panels to your specifications or we can provide custom panels designed to meet your needs.

UL 508A Industrial Control Panel Certification for both US and Canada.

TRIVACO Process Automation is proud to be a member of the Rockwell Automation PartnerNetwork™ program as an OEM Program Participant.

"Just wanted to let you guys know that we greatly appreciate your detailed work and service! I know maintaining the missing parts list consumes a huge amount of time following up with vendors and such, but it's very helpful. You guys are blowing away your competitors with your service. Thanks for working hard for us!"

~ MAJOR MACHINE COMPANY

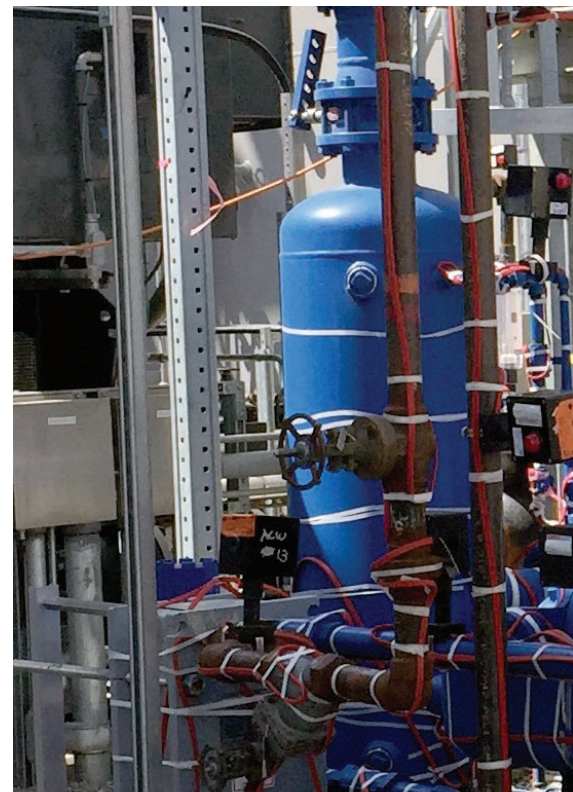

Heat Trace Solutions

Innovative steam and electric tracing services tailored to the needs of your business. We specialize in freeze protection and process maintenance applications utilizing electrical heat tracing cables. Our expertise can effectively reduce heat loss from process fluids, reduce the risk of damage to piping, and lessen the risk of operation interference, which can decrease energy usage and costs by a significant amount.

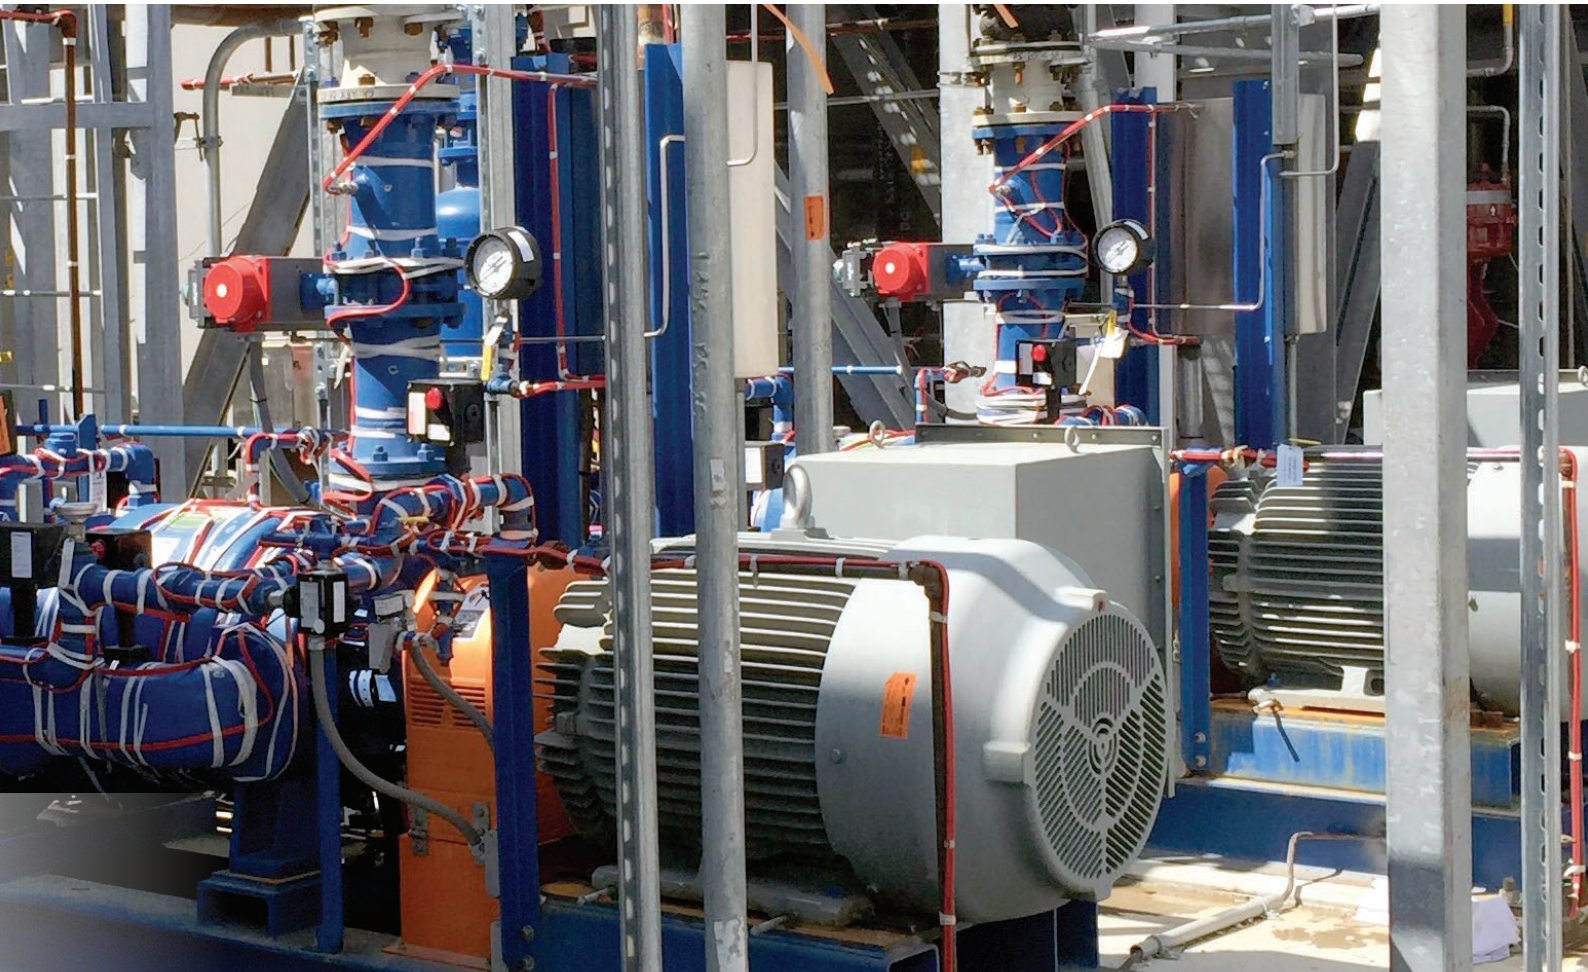

Steam and electric tracing systems are engineered and installed for:

- Electrical distribution
- Freeze protection
- Temperature stabilization

Our team of professionals are experienced in a variety of industrial applications.

A DIVISION OF Classic Industrial Services

Custom Skid Manufacturing

TRIVACO offers custom integrated process skid packages to meet your specific design and process requirements, all fabricated in-house at our facility. Modular process skids can provide a robust, cost-efficient alternative to traditional process systems and equipment and can be combined to create larger systems. We can fabricate one skid all the way up to a whole process system. TRIVACO serves all industries, including power, chemical, pharmaceutical, process, material handling and mining industries.

TRIVACO Skid Solutions Include:

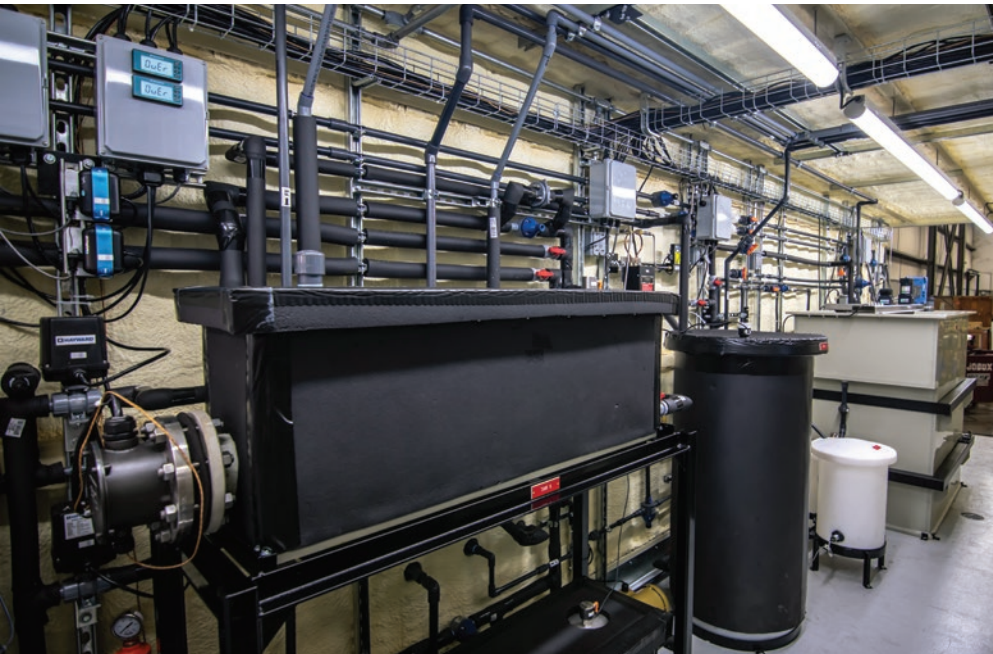

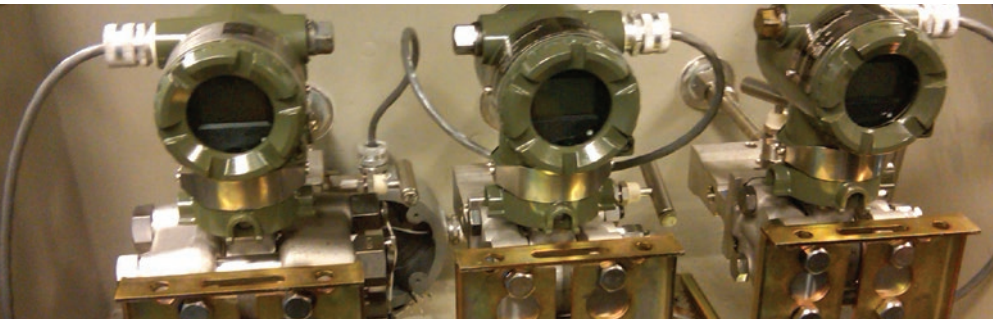

- **Equipment skids** used for process equipment, equipment transportation and storage
- **Tank skids** used in processing plants, water filtration plants and oilfield applications
- **Pump skids** used for pumping equipment in process plants, power, chemical and pharmaceutical plants, oilfields, and fire pumping equipment
- **Custom skids** for unique applications
